Professional Summary

Full-Stack Web Developer with 1 year of experience building and maintaining end-to-end web applications, from responsive UI to backend services and databases. Proficient in modern JavaScript frameworks, RESTful API development, and AWS cloud services. Strong background in front-end UI development, server-side logic, and data workflows, with a focus on writing clean, efficient code and delivering features that improve user experience and system performance.

Skills

Front-End: HTML, CSS, JavaScript, ReactJS, Material UI

Back-End: Node.js, Express.js, RESTful APIs, Python

Databases: PostgreSQL, MongoDB, SQLs

Tools & Platforms: Git, SourceTree, VS Code, Postman, Jira, AWS

Design: Figma, Canva

Languages: English, Filipino

Projects

HRC – Marketing & Sales Management Platform (Professional Project)

- Developed and maintained a centralized marketing and sales platform for managing products, bookings, trainings, memberships, and real property listings.
 - Built both front-end and back-end features, including Creative Brief management, templated posters, email drip campaigns, sales reports, and real property workflows from creation to report generation.
 - Implemented service availment setup for trainings and memberships.
 - Developed a website templating system similar to Wix, allowing users to create and manage templated websites.
- *Tech: **ReactJS, MUI, Python, PostgreSQL, AWS***

POFShop – Customer Availment & Review Platform (Professional Project)

- Developed a customer-facing platform integrated with HRC to display configured products, trainings, bookings, and real property offerings.
 - Implemented website UI rendering based on templates created in the HRC system.
 - Built training availment functionality, enabling users to browse and enroll in available offerings.
 - Ensured seamless data synchronization between HRC (admin) and POFShop (customer) platforms.
- *Tech: **ReactJS, MUI, Python, PostgreSQL, AWS***

Expensia – Expense Tracking & Reporting App (Personal Project – Live)

- Designed and developed a live expense management application end-to-end, from ideation and process flows to UI design, backend development, database modeling, and deployment.
 - Implemented expense tracking with categorization, transaction history, and edit/delete functionality.
 - Built dashboards and reports for monthly and custom date-range expense analysis.
 - Handled ongoing maintenance and feature improvements.
- *Tech: **ReactJS, MUI, Node.js, Express, MongoDB, AWS***

Experience

Web Developer - POFSIS

Ibayo-Tipas, Taguig City | January 2025 – June 2026

- Developed and maintained web applications focused on the HRC and POFShop platforms.
- Designed wireframes and system flows for Real Property features to support development and implementation
- Implemented front-end and back-end functionality, contributing to end-to-end feature development and system enhancements.

IT Associate - Nauts and Vectors Company Inc.

Rosario, Pasig City | October 2024 - January 2025

- Managed and maintained the company's IT asset database, ensuring accurate updates and new entries using Google Sheets and Microsoft Excel.
- Provided on-site and remote technical support, troubleshooting hardware, software, and basic network issues.
- Assisted in optimizing network performance by diagnosing and resolving connectivity problems.

Software Development in MDRRMO - Work Immersion

Sta. Margarita, Samar | March - May 2024

- Developed a desktop-based database system using Visual Studio, .NET Framework, and Windows Forms.
- Implemented real-time database connectivity with MySQL.
- Built data synchronization between MySQL and Excel using ODBC for dynamic data reporting and presentation.
